NON-LINEAR SUMMING PLUGIN

NLS

NON-LINEAR SUMMING PLUGIN

BASED ON
CLASSIC CONSOLES

MODELED IN ASSOCIATION WITH
MARK 'SPIKE' STENT
MIKE HEDGES
YOAD NEVO

Waves, together with three of today's leading producer/engineers, brings you the analog summing sound of three legendary consoles.

- The SSL 4000G console belonging to Mark 'Spike' Stent (*Radiohead, Björk, Muse, Maroon 5, Madonna*).
- The EMI TG12345 Mk 4 desk owned by Mike Hedges (*The Cure, Siouxsie and the Banshees, Dido, Faithless, Manic Street Preachers, U2*), heard on such timeless recordings as Pink Floyd's *The Dark Side of the Moon*.
- The Neve 5116 console custom-made for Yoad Nevo (*Bryan Adams, Pet Shop Boys, Sugababes, Goldfrapp, Air*).

In all, Waves meticulously modeled over 100 individual channels, analyzing and emulating the distinctive color, character, and behavior of each and every input and summing bus amp.

One of the great things about the digital environment is also one of its greatest drawbacks: Its linearity, while utterly transparent, often results in sterile tracks that lack warmth and harmonic depth. NLS delivers the richness and complexity that only analog gear has been able to provide – until now.

NON-LINEAR SUMMING: NO MORE, NO LESS. WAVES NLS.
