Tell the world

Embargoed until: 01/06/2022

**The easiest way
to bring studio
quality sound to
your podcast.**

Vocaster features Auto Gain, to set levels quickly and easily; Enhance, to get your voice sounding its best in one click; and connections for your phone, camera and so much more.

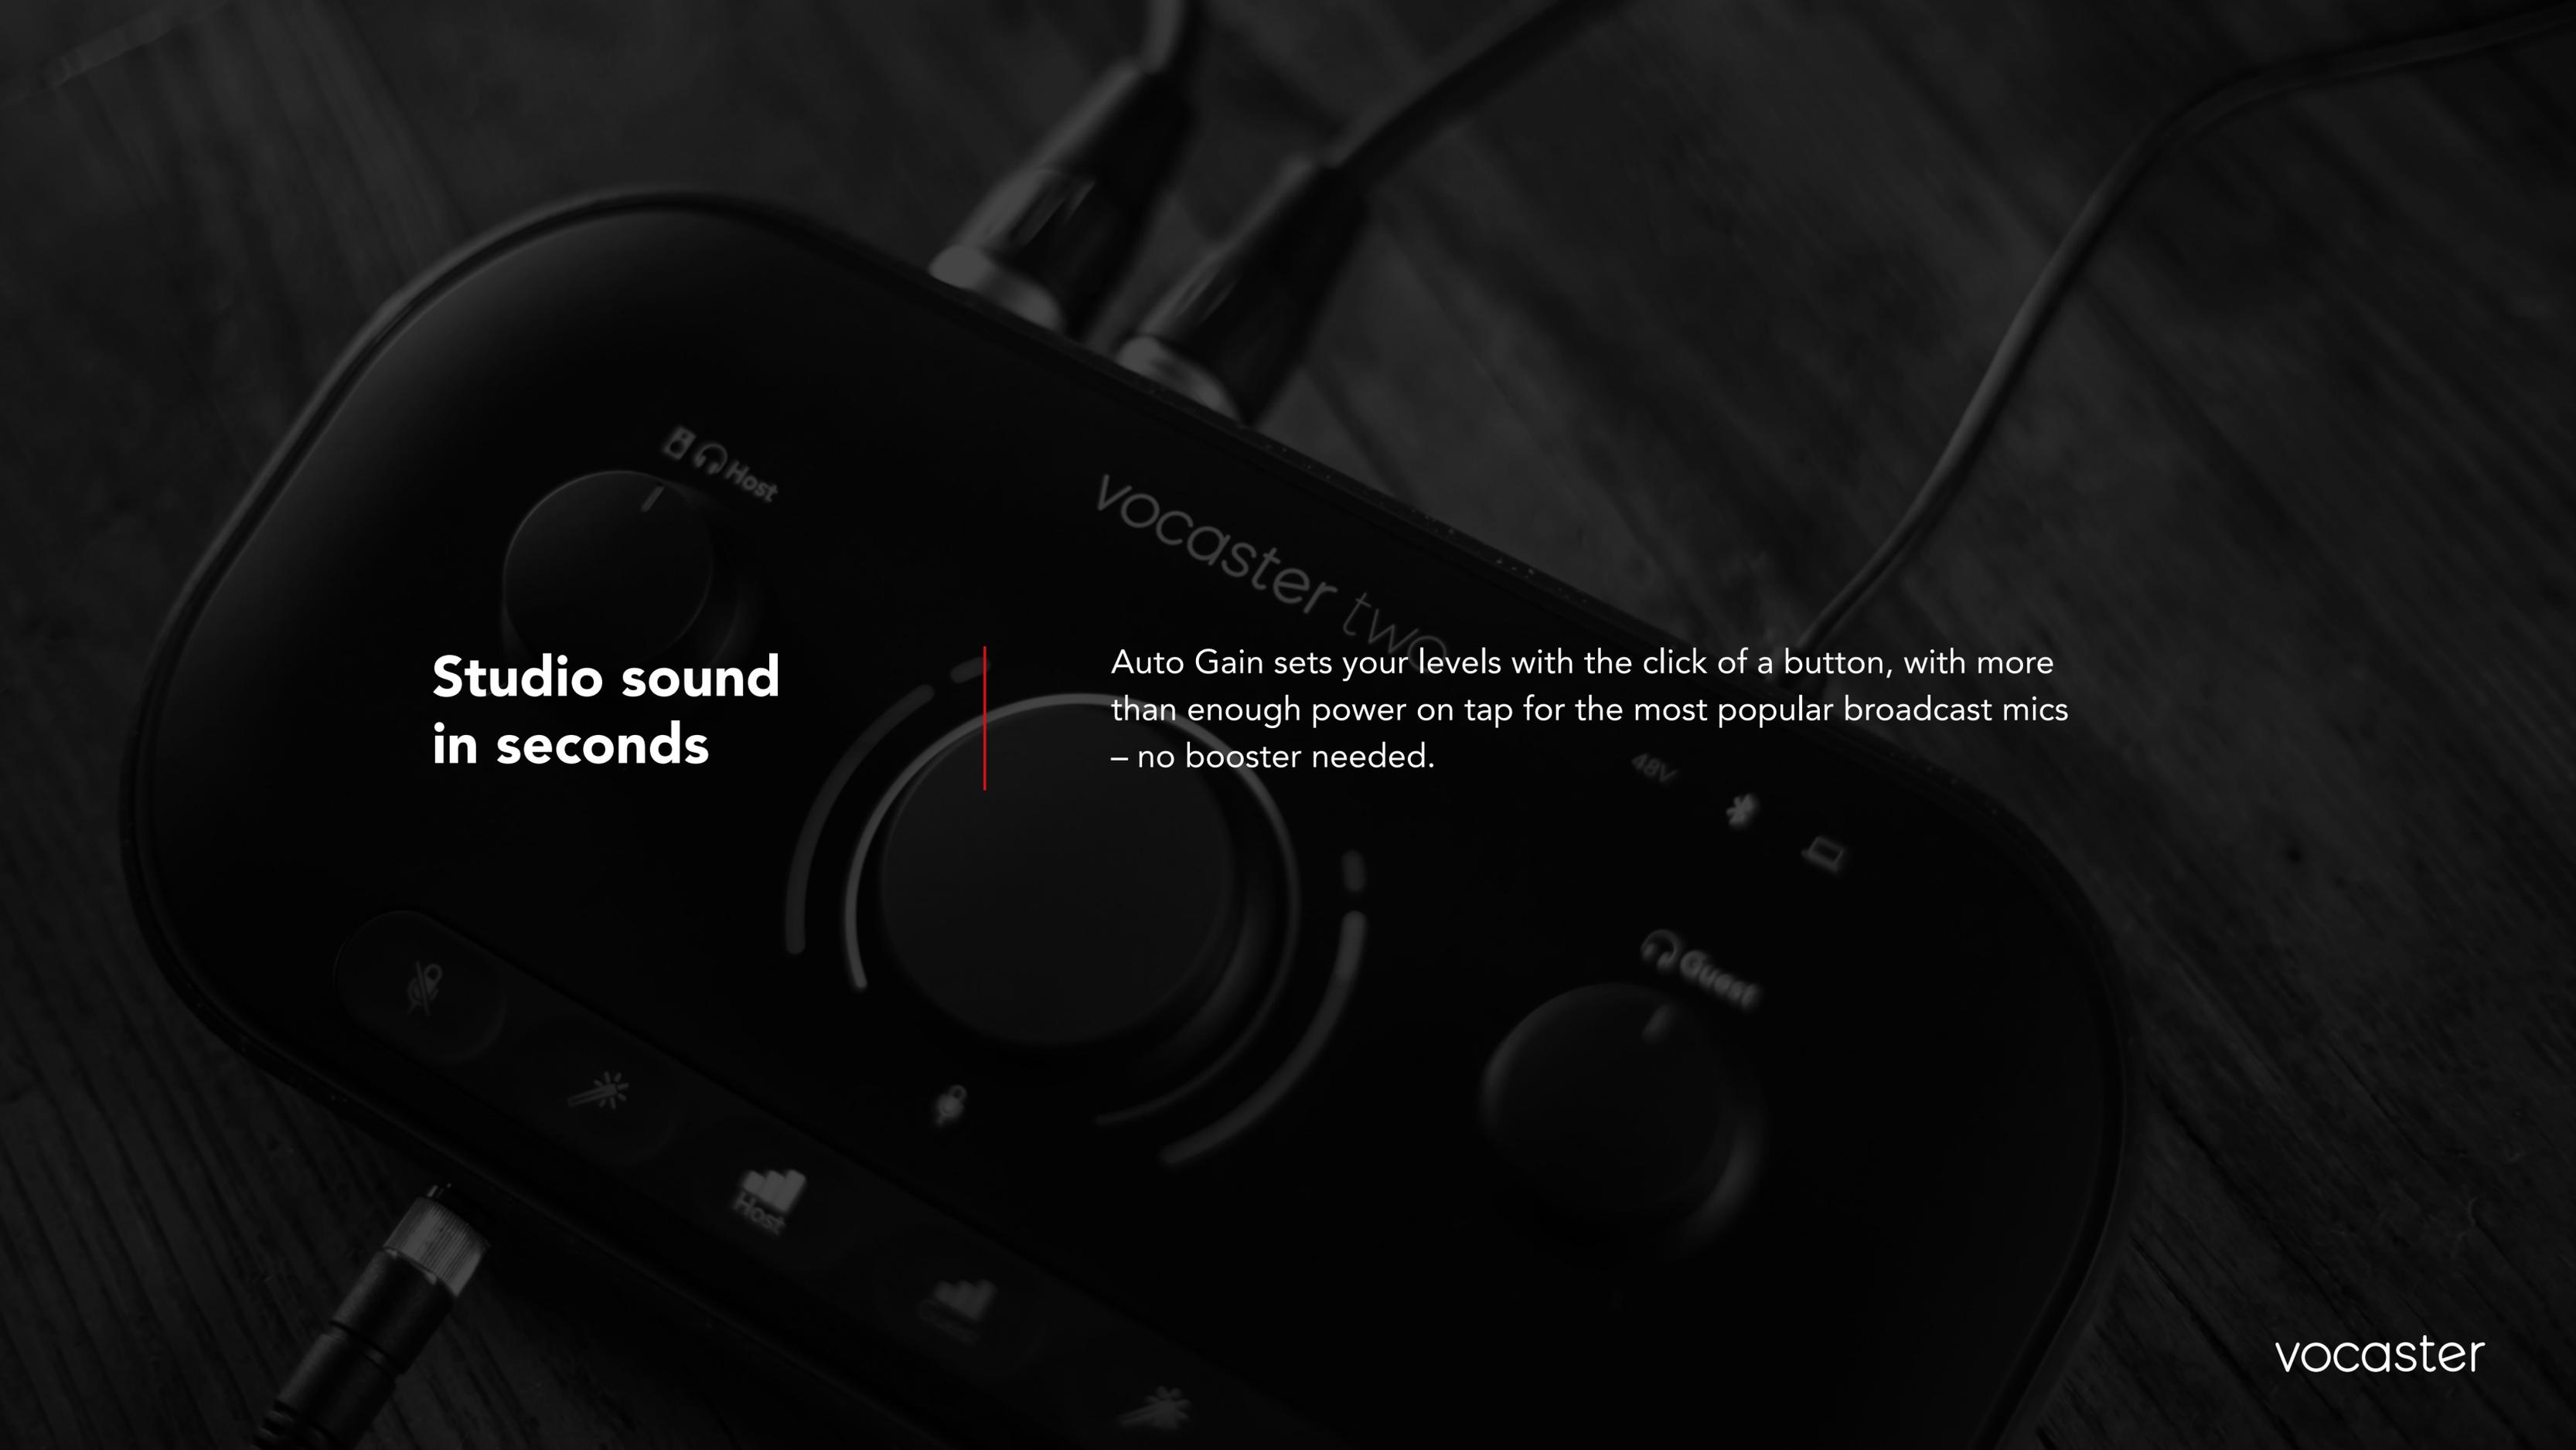

Focusrite interfaces sit at the heart of more studios than any other. Now, let your voice be heard like it never has before.

Feature Overview

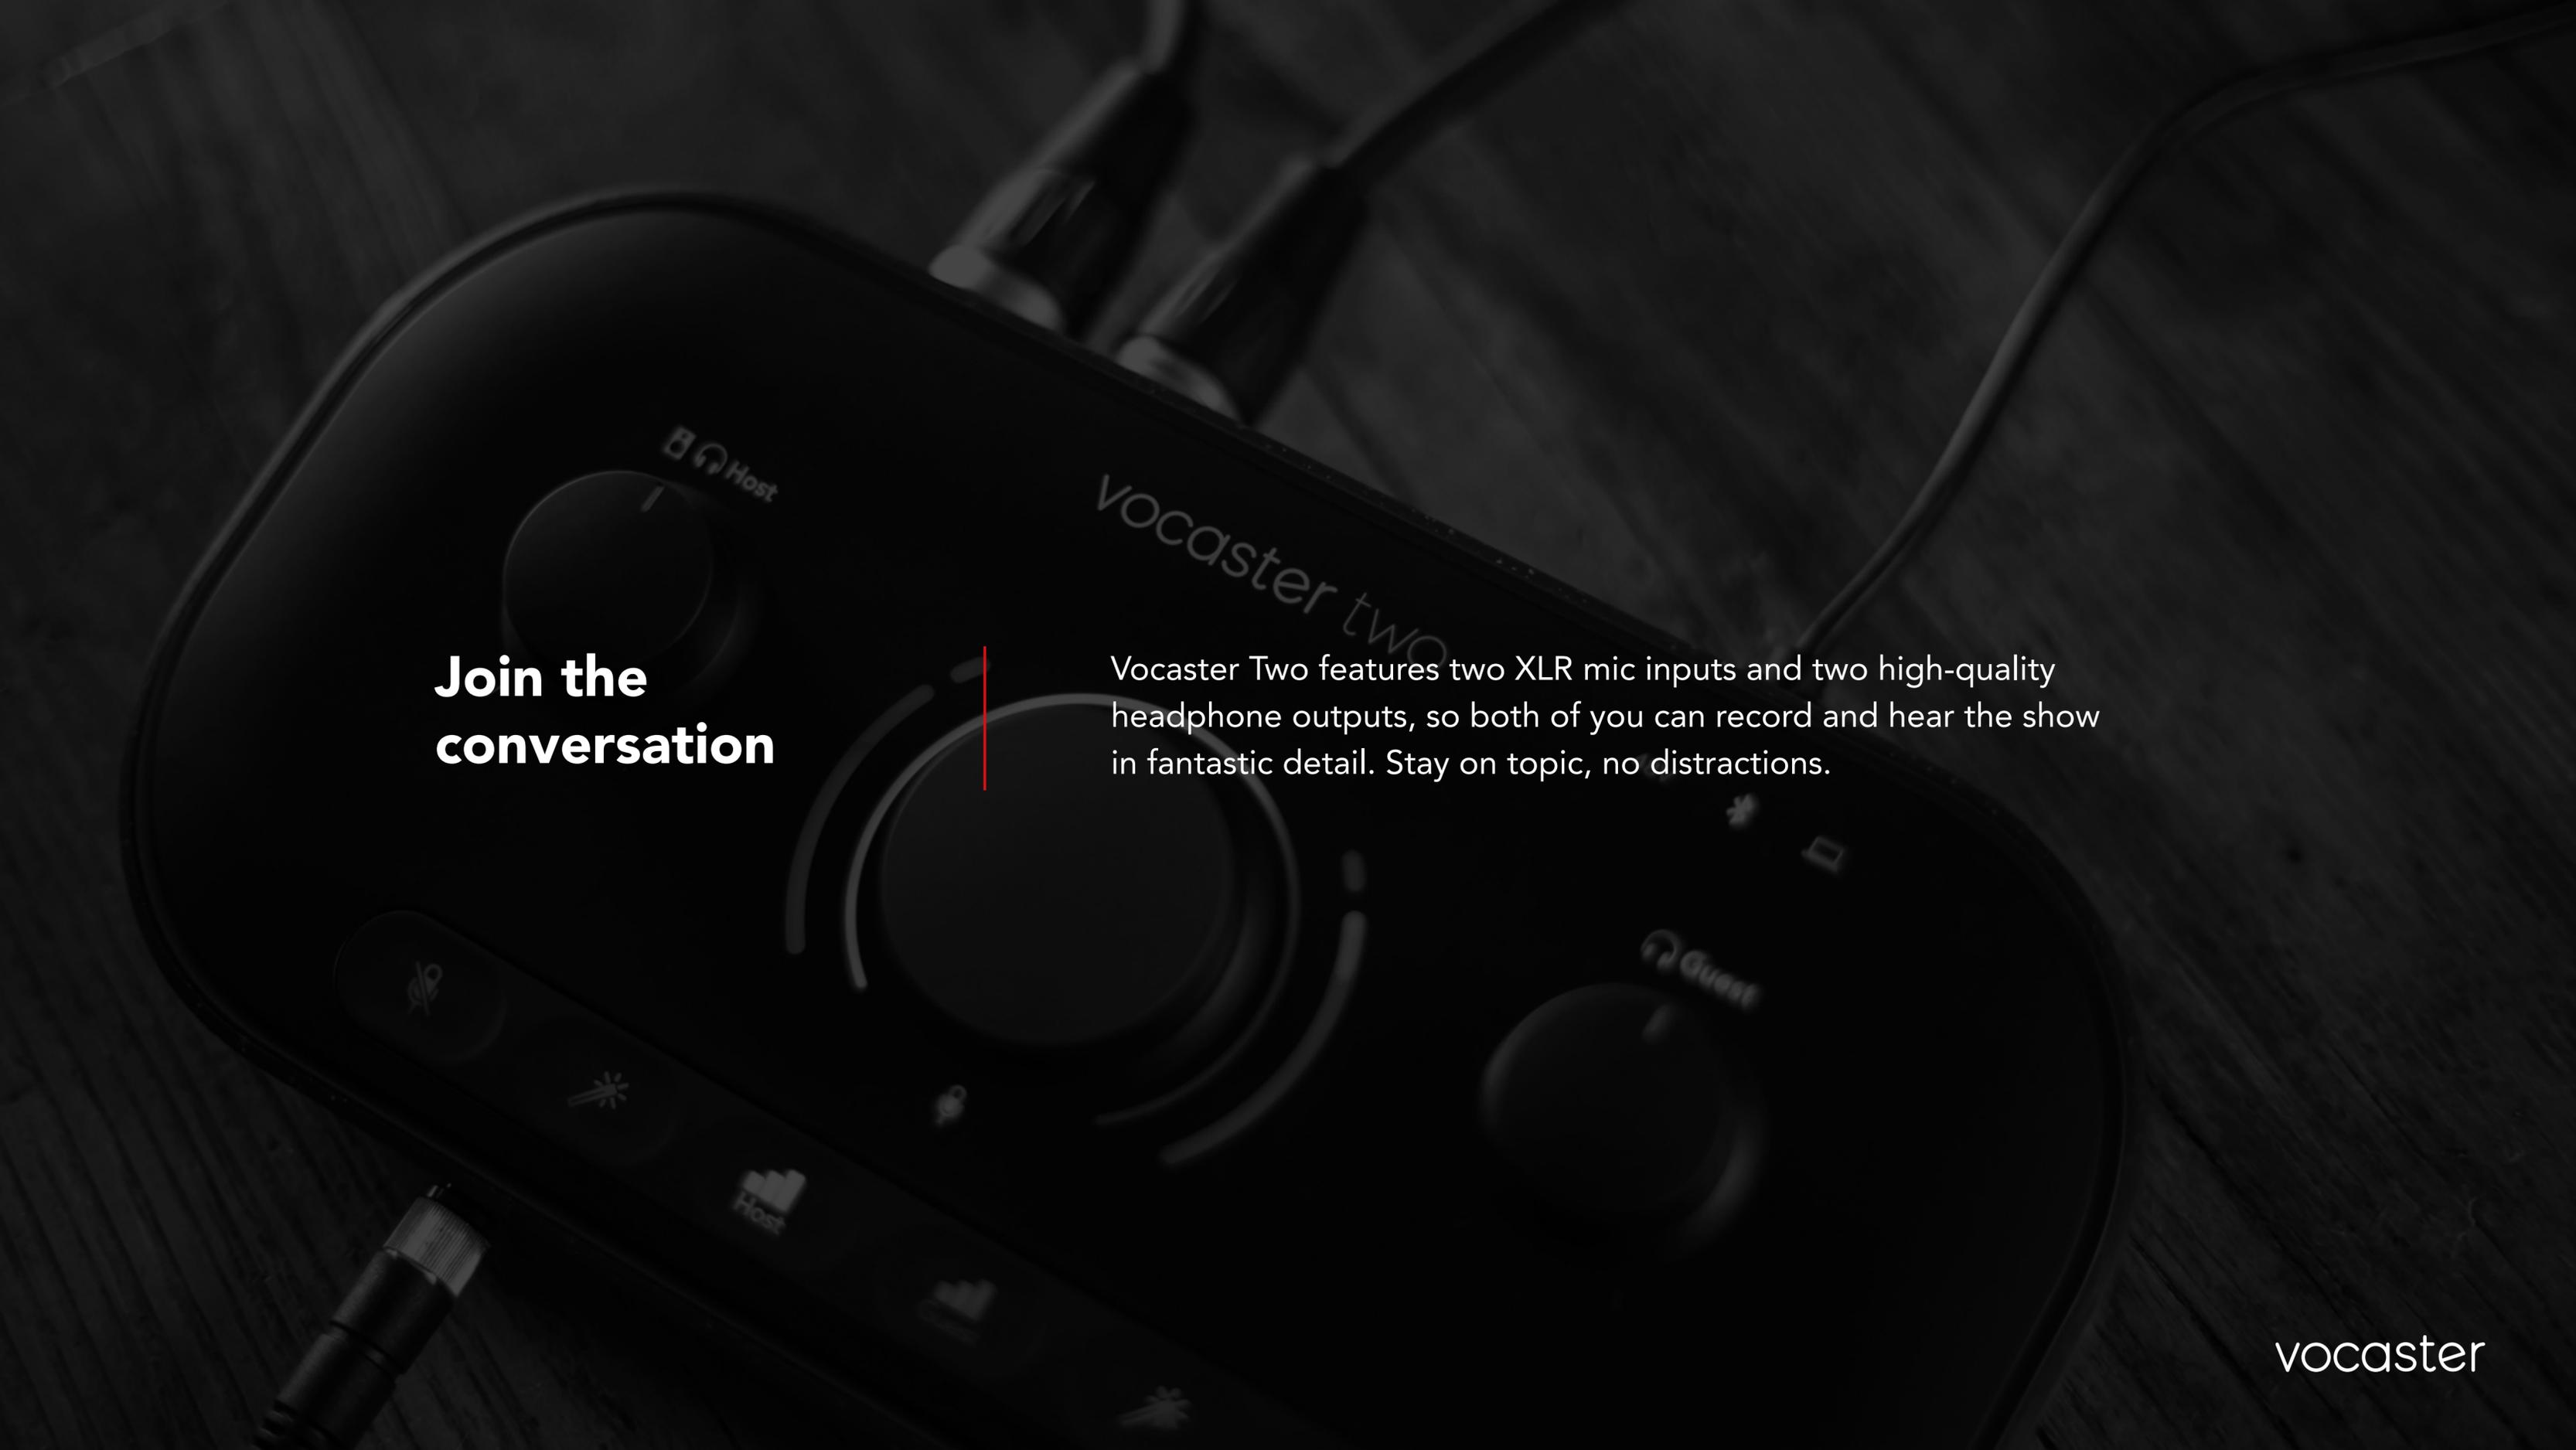

Studio sound in seconds

Auto Gain sets your levels with the click of a button, with more than enough power on tap for the most popular broadcast mics – no booster needed.

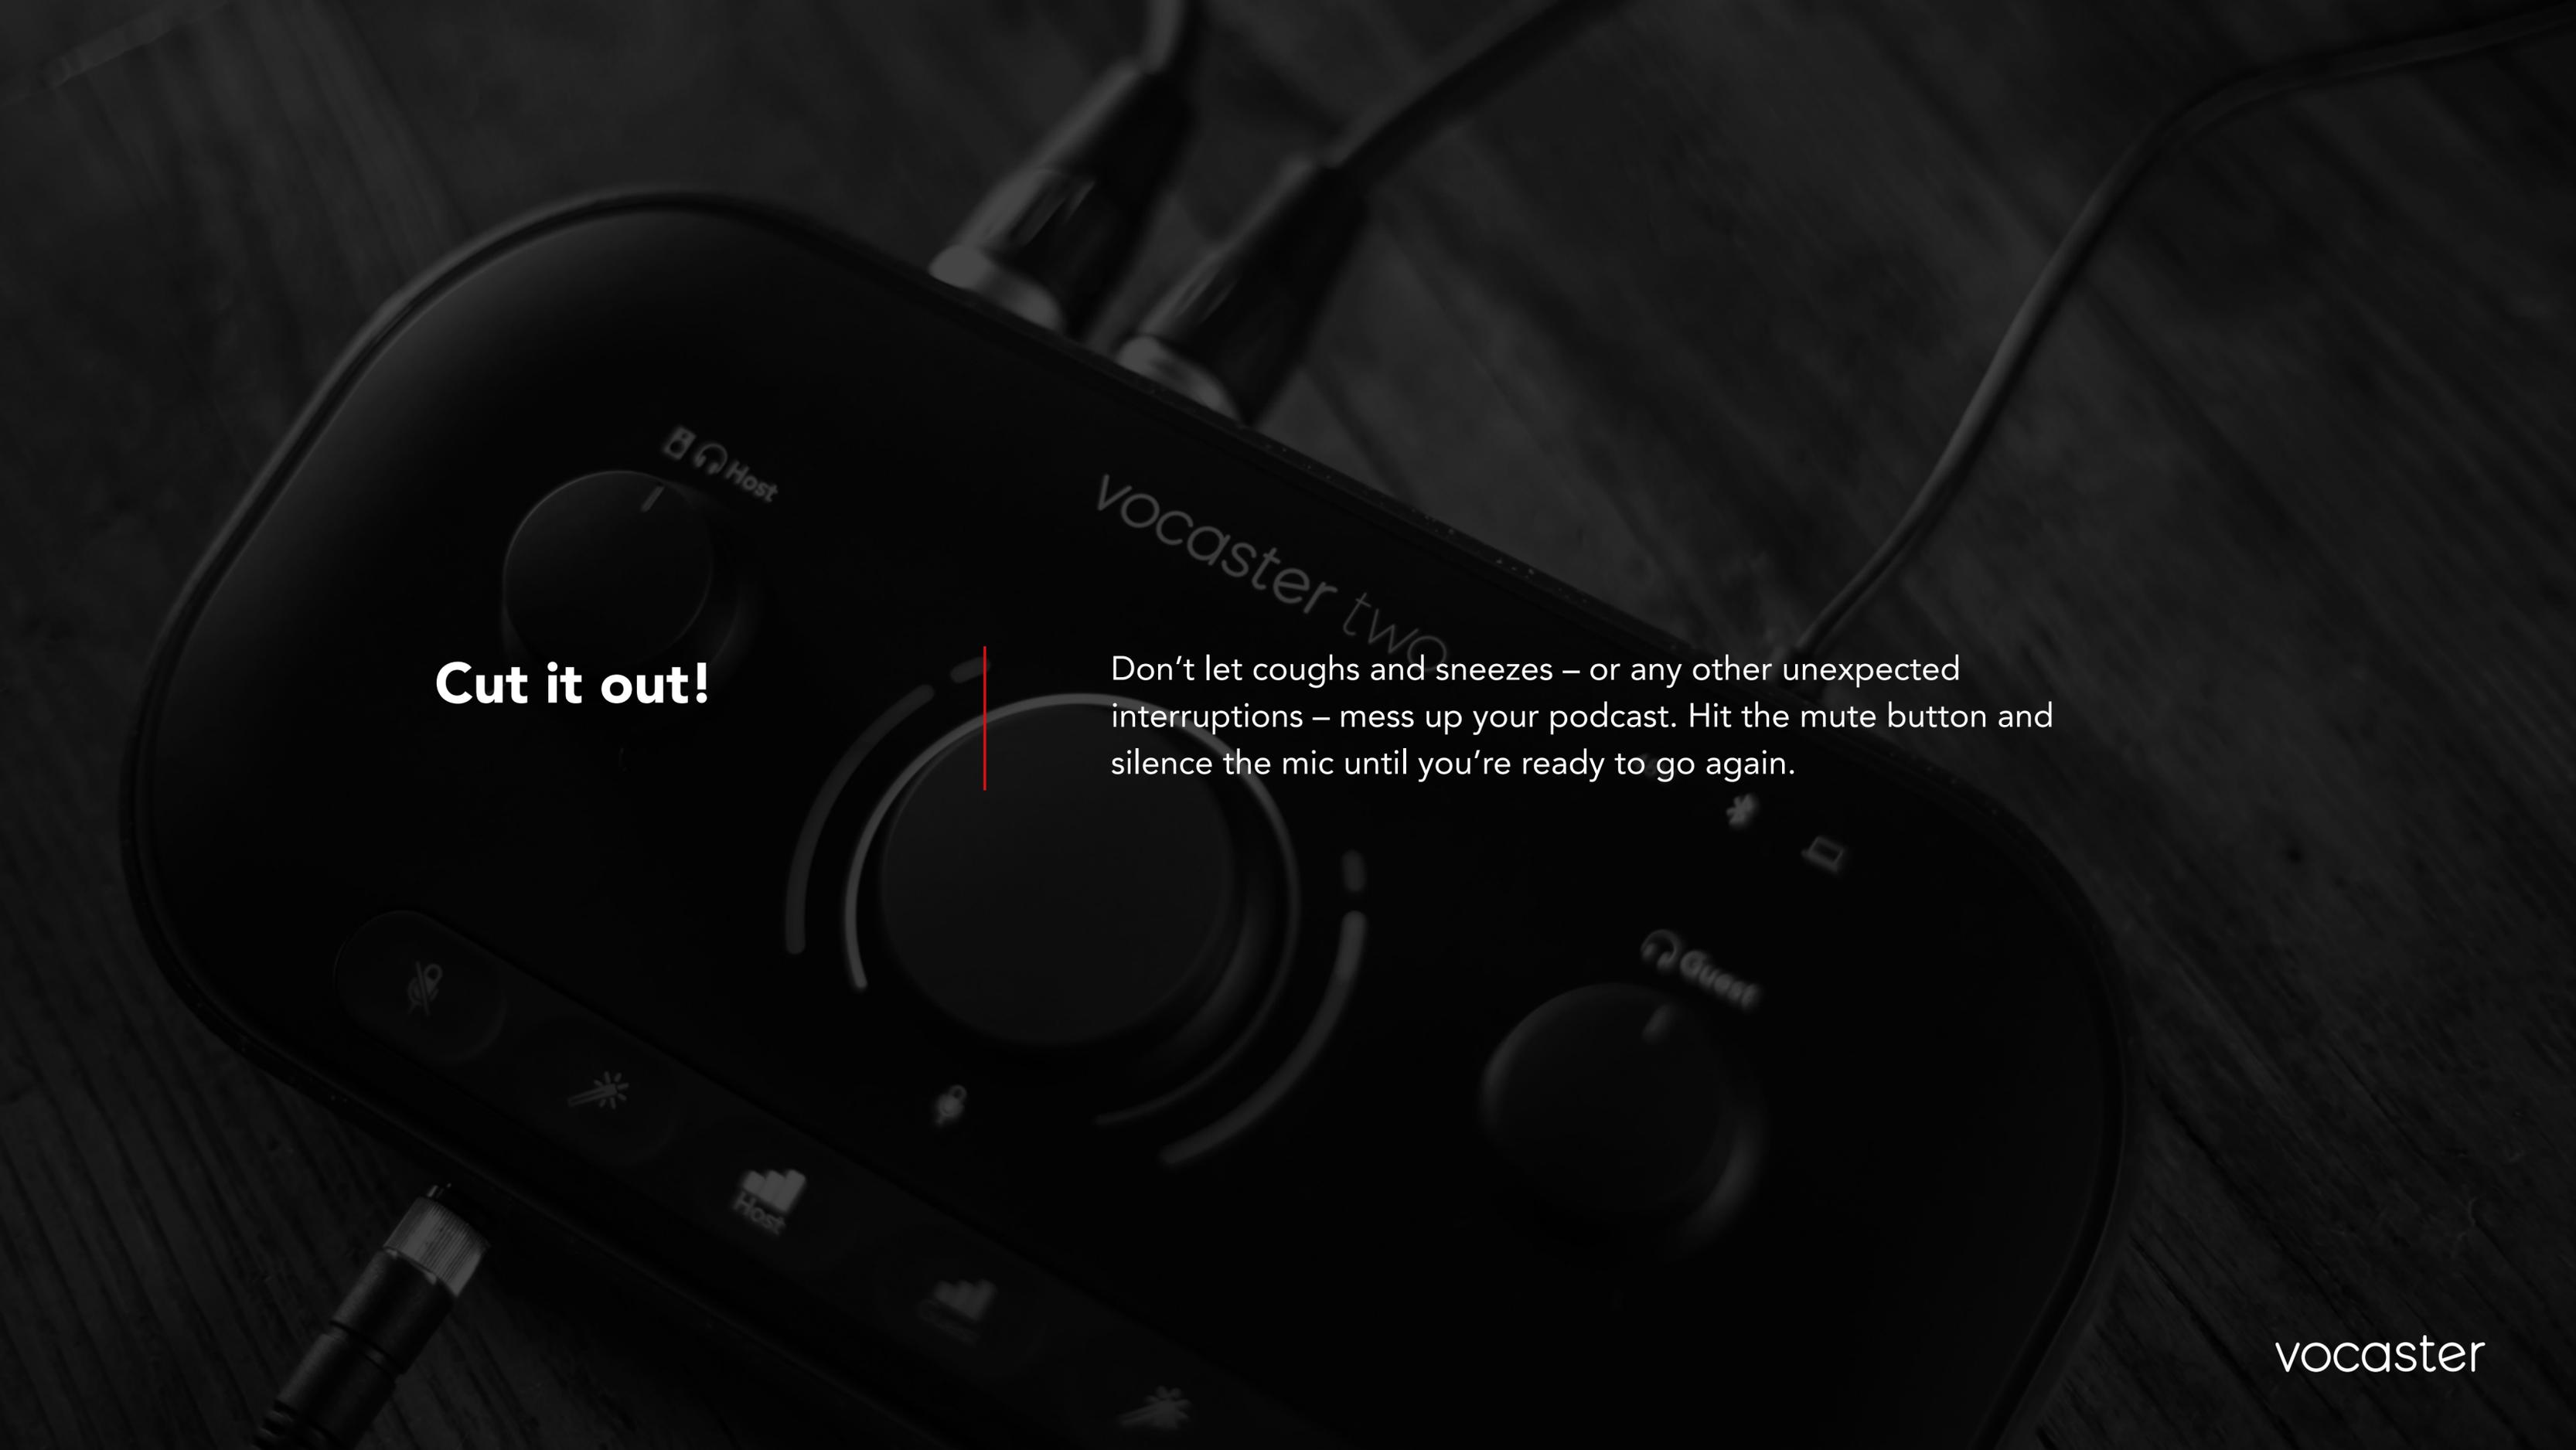

Find your voice

The Enhance button reveals the true quality of your voice. Get the clearest sound first time. Three podcaster-approved voice presets bring out the best in any voice.

A dark, high-angle photograph of a Vocaster Two audio interface. The device is black with a textured surface. It features two large circular knobs, one labeled 'Host' and one labeled 'Guest'. There are several buttons and indicators, including a 'Host' button with a microphone icon, a 'Guest' button with a microphone icon, and a 'Host' button with a speaker icon. The text 'vocaster two' is printed on the top edge of the device. The background is dark and out of focus, showing some cables and a wooden surface.

Join the conversation

Vocaster Two features two XLR mic inputs and two high-quality headphone outputs, so both of you can record and hear the show in fantastic detail. Stay on topic, no distractions.

A close-up, dark, and slightly blurred photograph of the control panel of a Vocaster Two microphone. The panel features two large volume knobs labeled 'Host' and 'Guest', a central mute button with a microphone icon, and various other control buttons and indicators. The text 'vocaster two' is visible on the top edge of the panel. The background is a dark, textured surface.

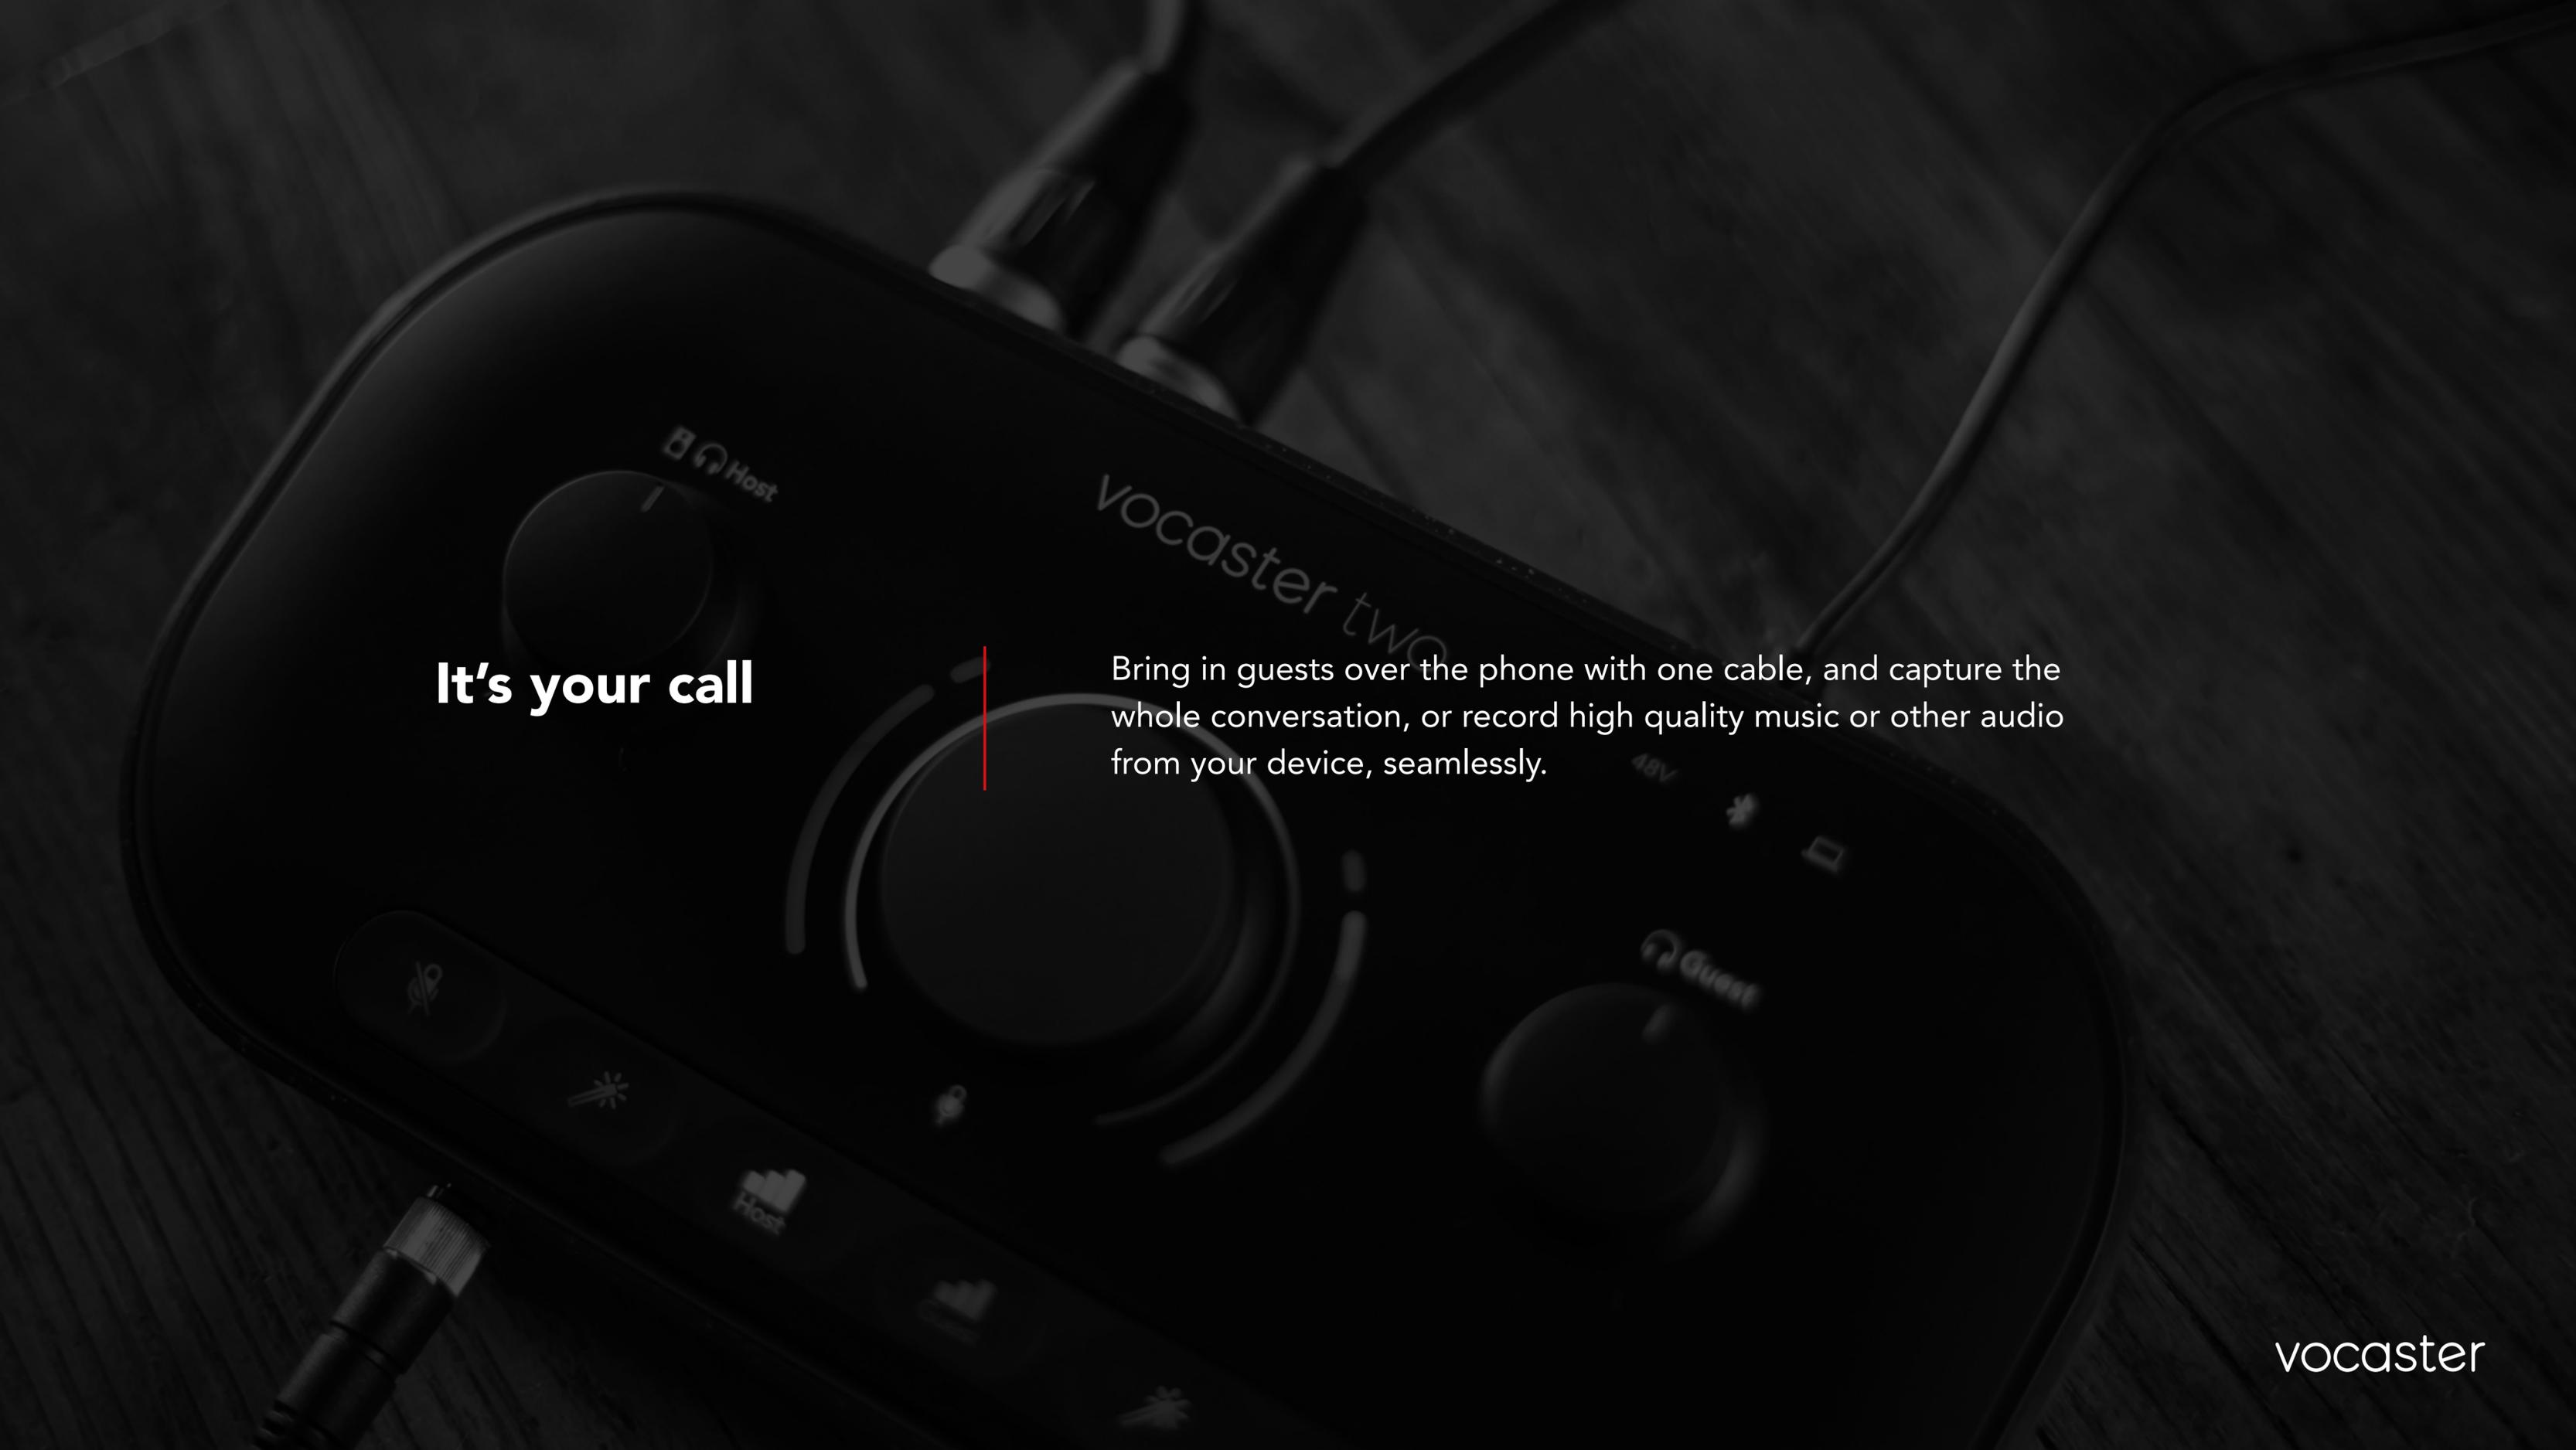

Cut it out!

Don't let coughs and sneezes – or any other unexpected interruptions – mess up your podcast. Hit the mute button and silence the mic until you're ready to go again.

Bluetooth

Bluetooth connectivity on Vocaster Two, makes it simple to record calls or sounds from your smart phone.

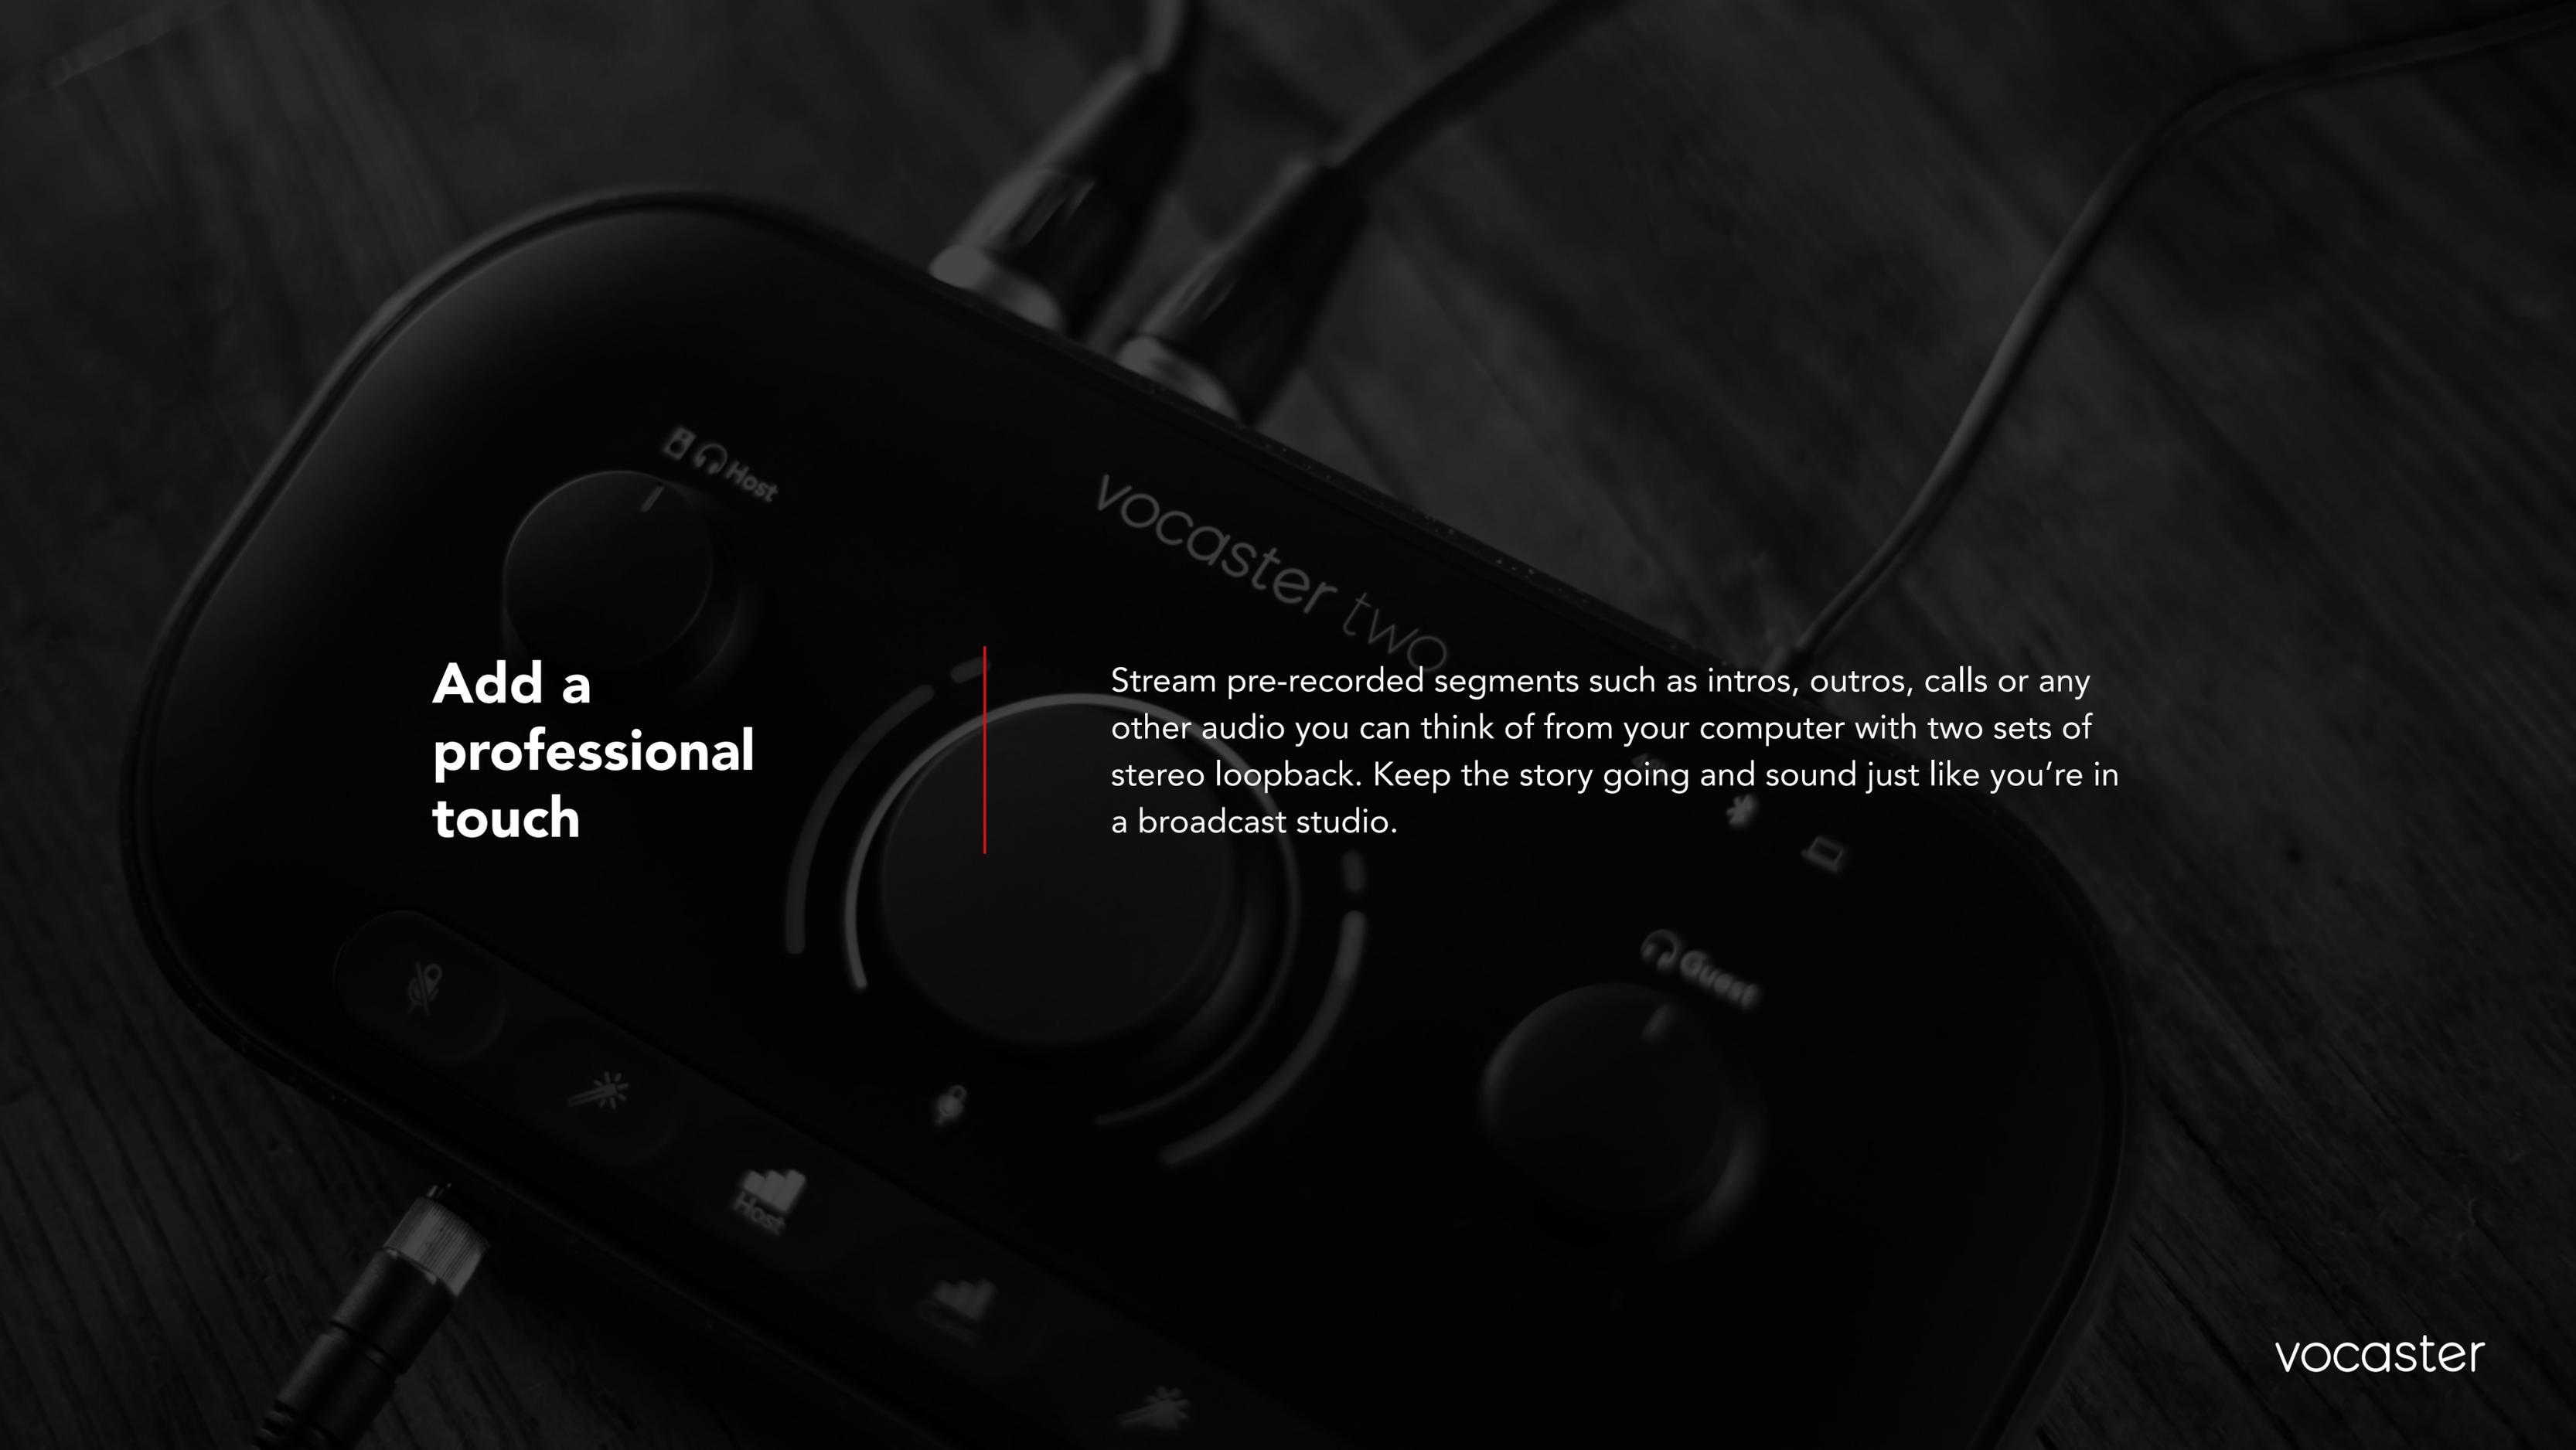

It's your call

Bring in guests over the phone with one cable, and capture the whole conversation, or record high quality music or other audio from your device, seamlessly.

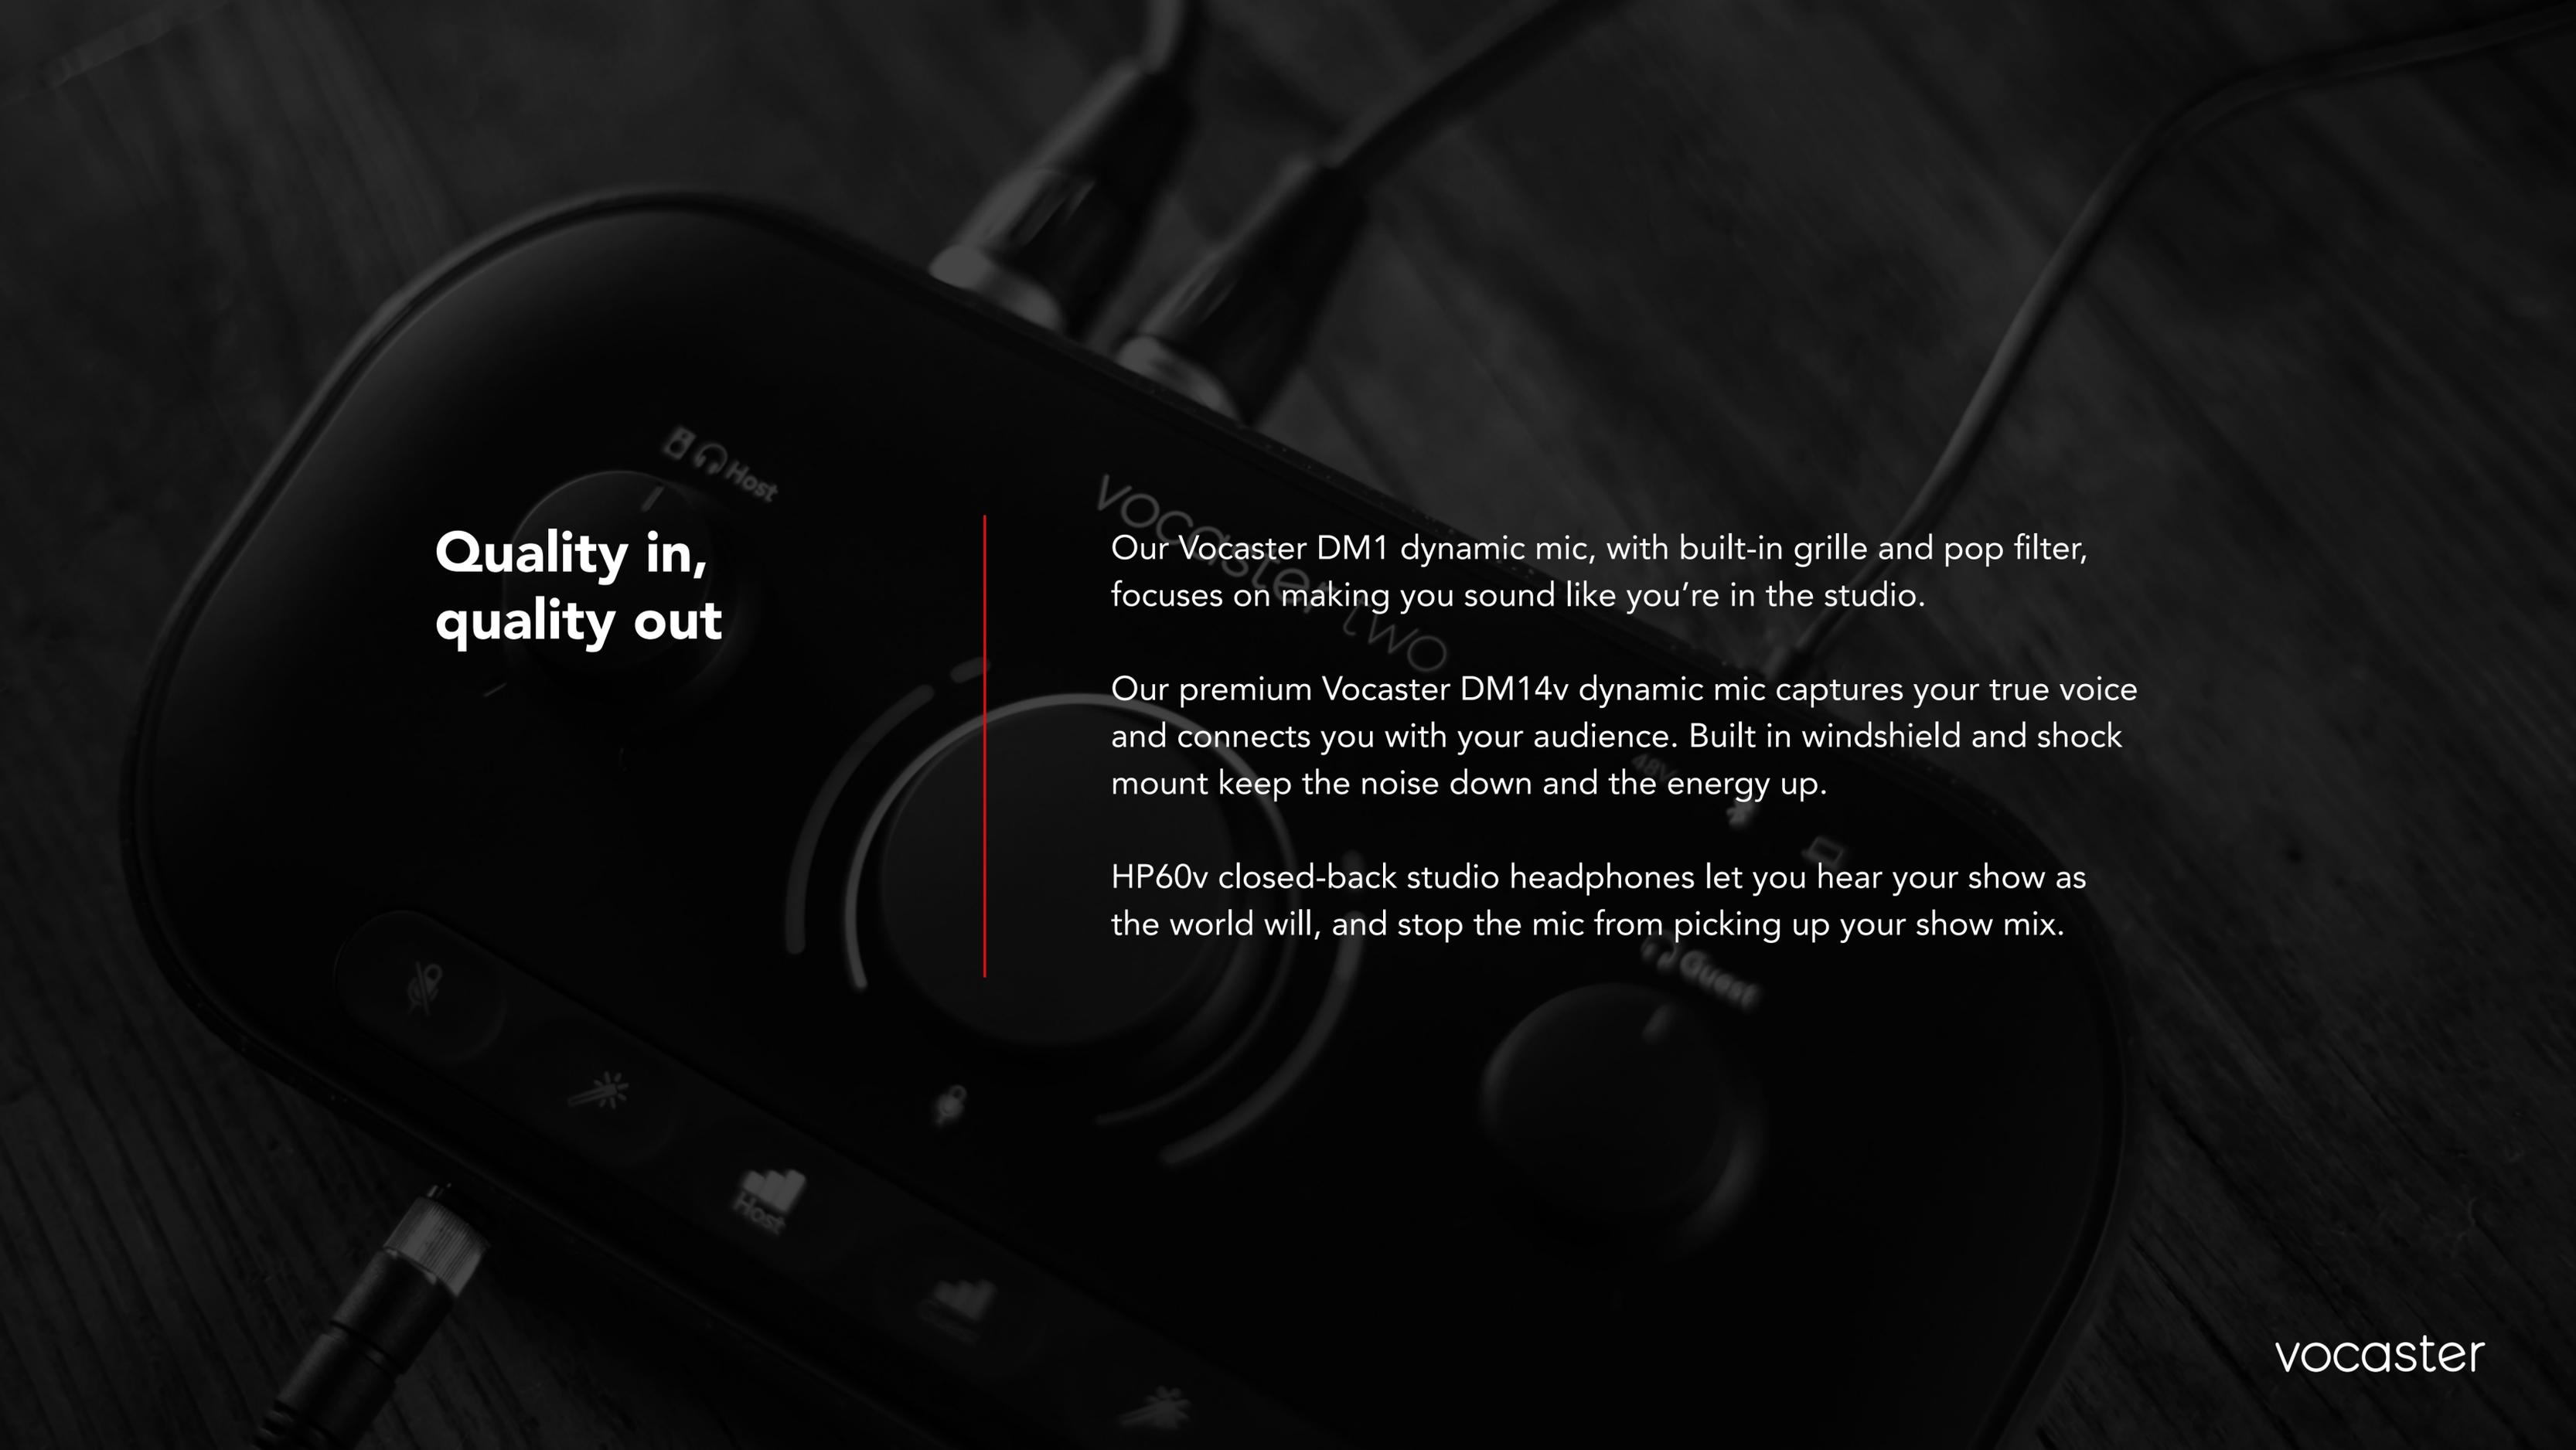

**Sound as good as
your video looks**

You're one cable away from adding Vocaster's studio sound to your vlog. No need to sync up in post, just plug in and hit the red button.

Add a professional touch

Stream pre-recorded segments such as intros, outros, calls or any other audio you can think of from your computer with two sets of stereo loopback. Keep the story going and sound just like you're in a broadcast studio.

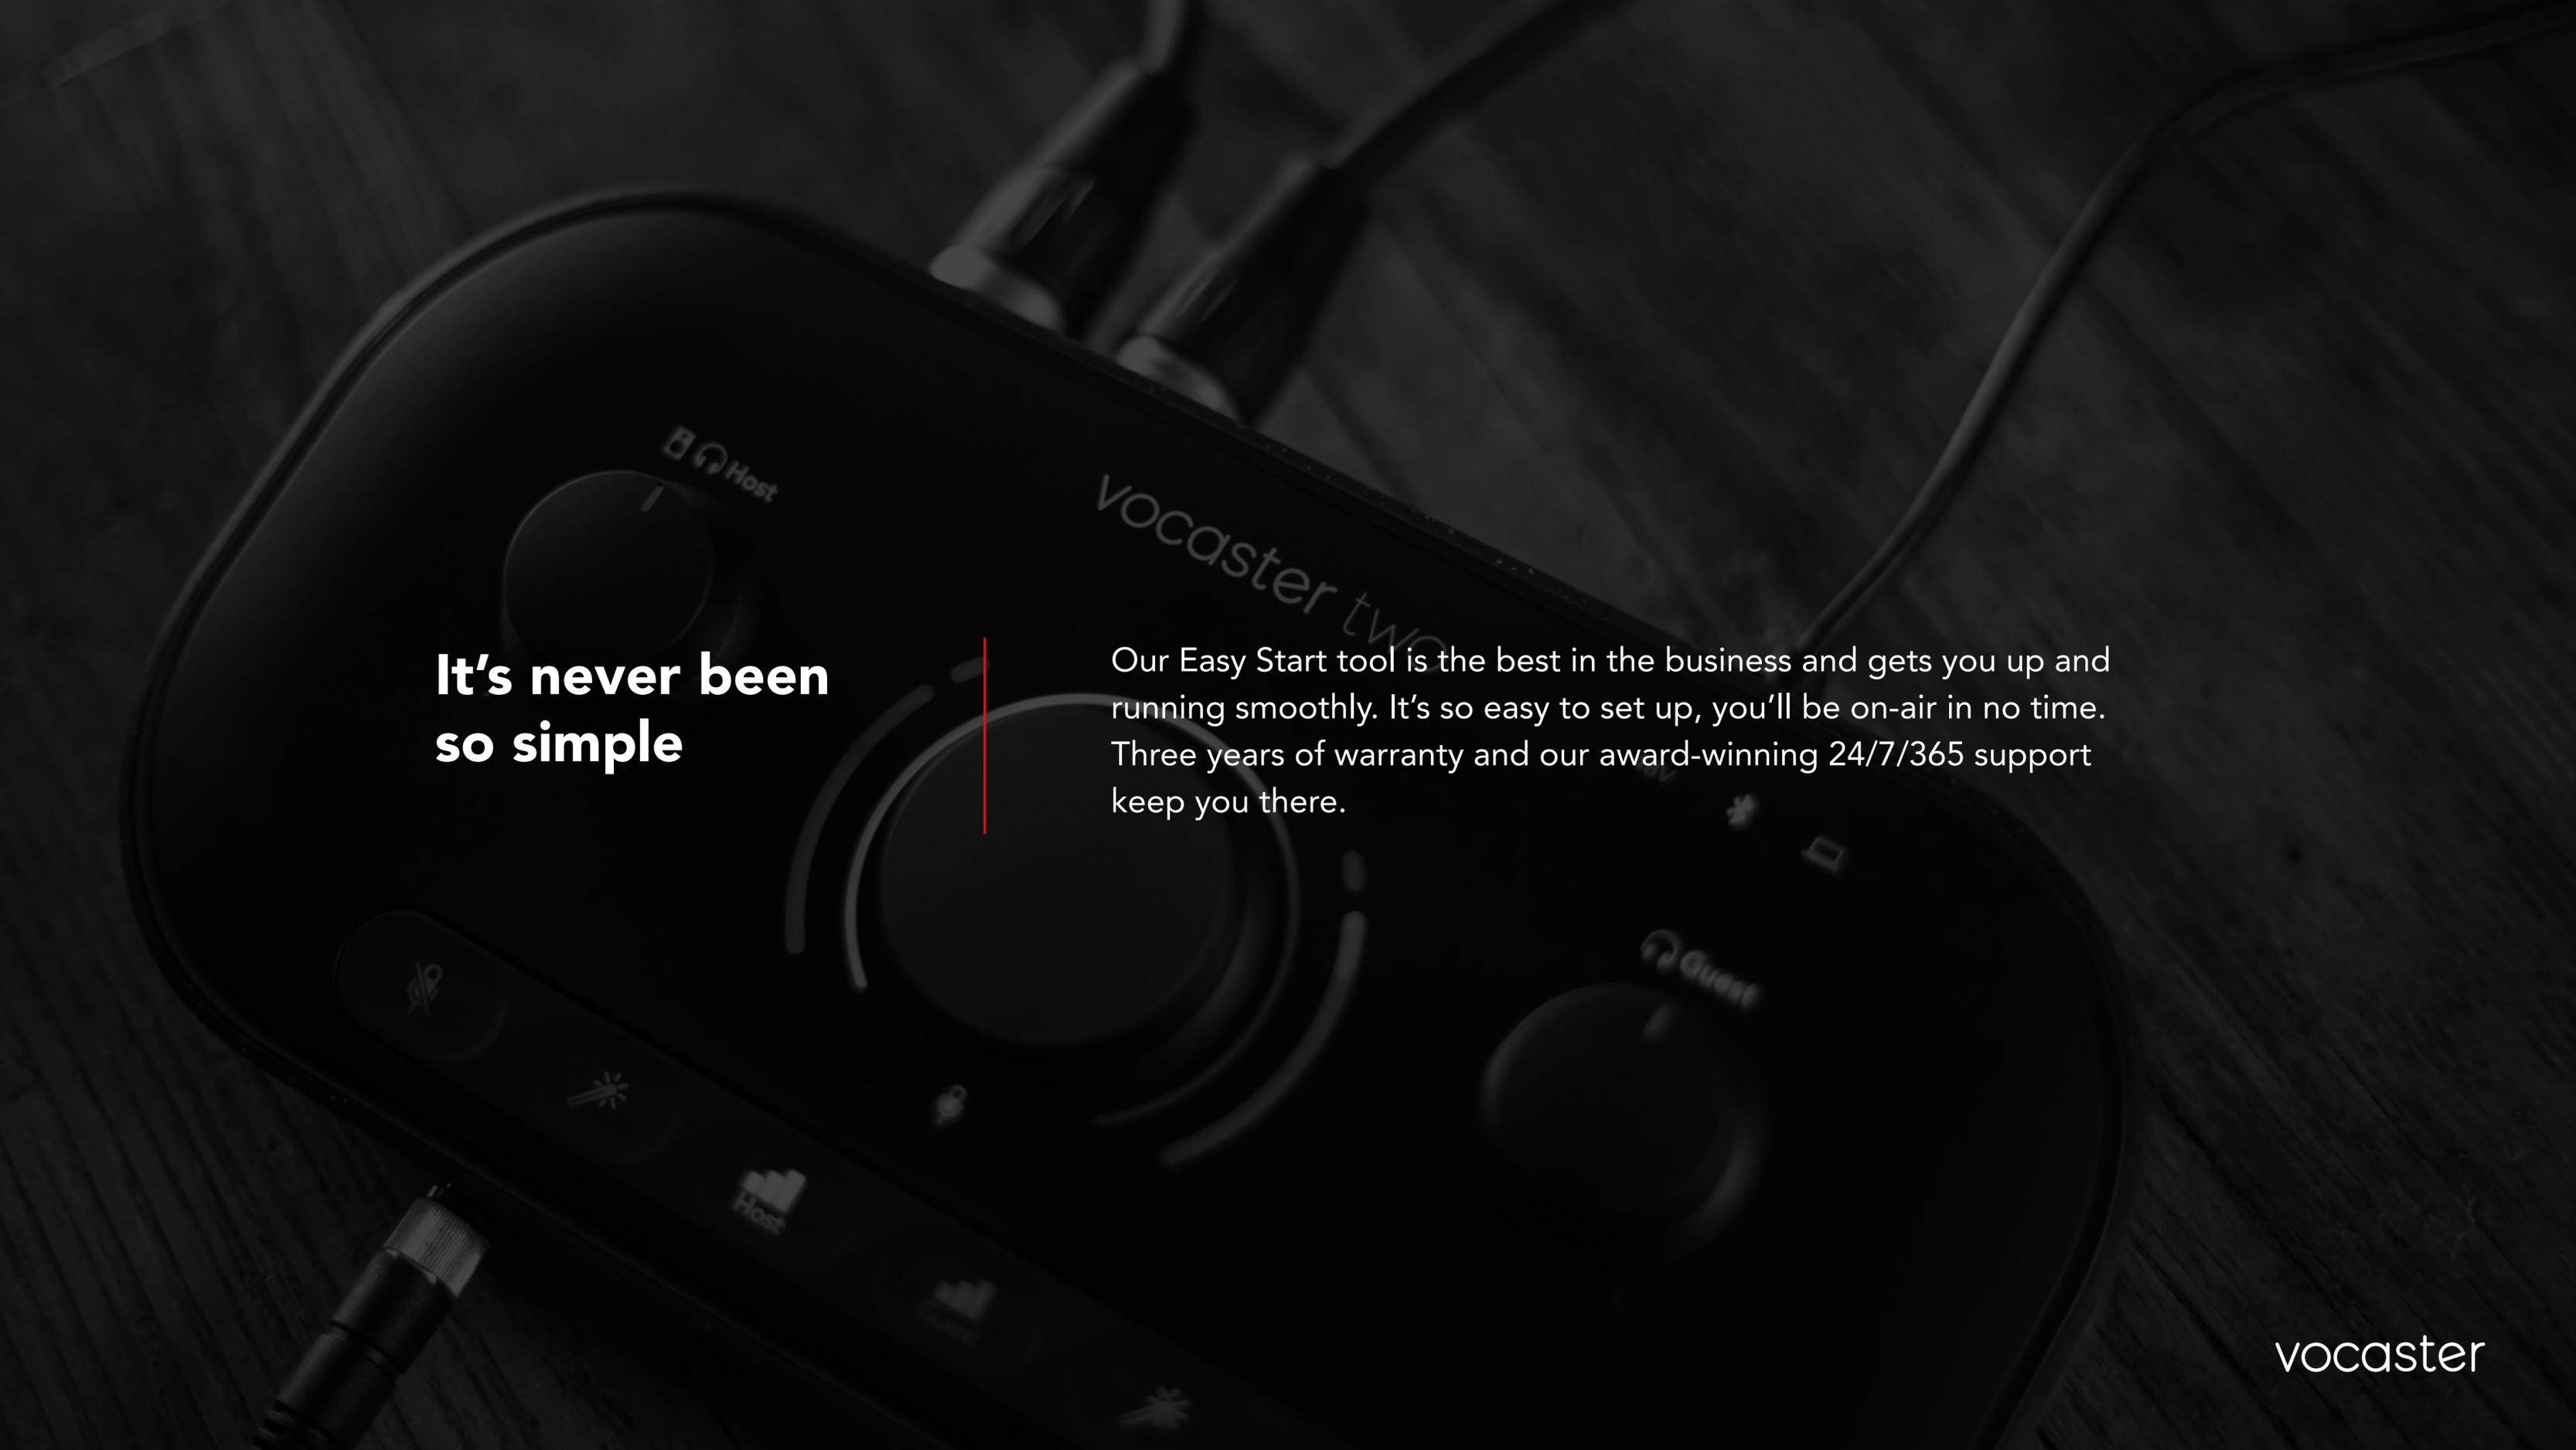

Quality in, quality out

Our Vocaster DM1 dynamic mic, with built-in grille and pop filter, focuses on making you sound like you're in the studio.

Our premium Vocaster DM14v dynamic mic captures your true voice and connects you with your audience. Built in windshield and shock mount keep the noise down and the energy up.

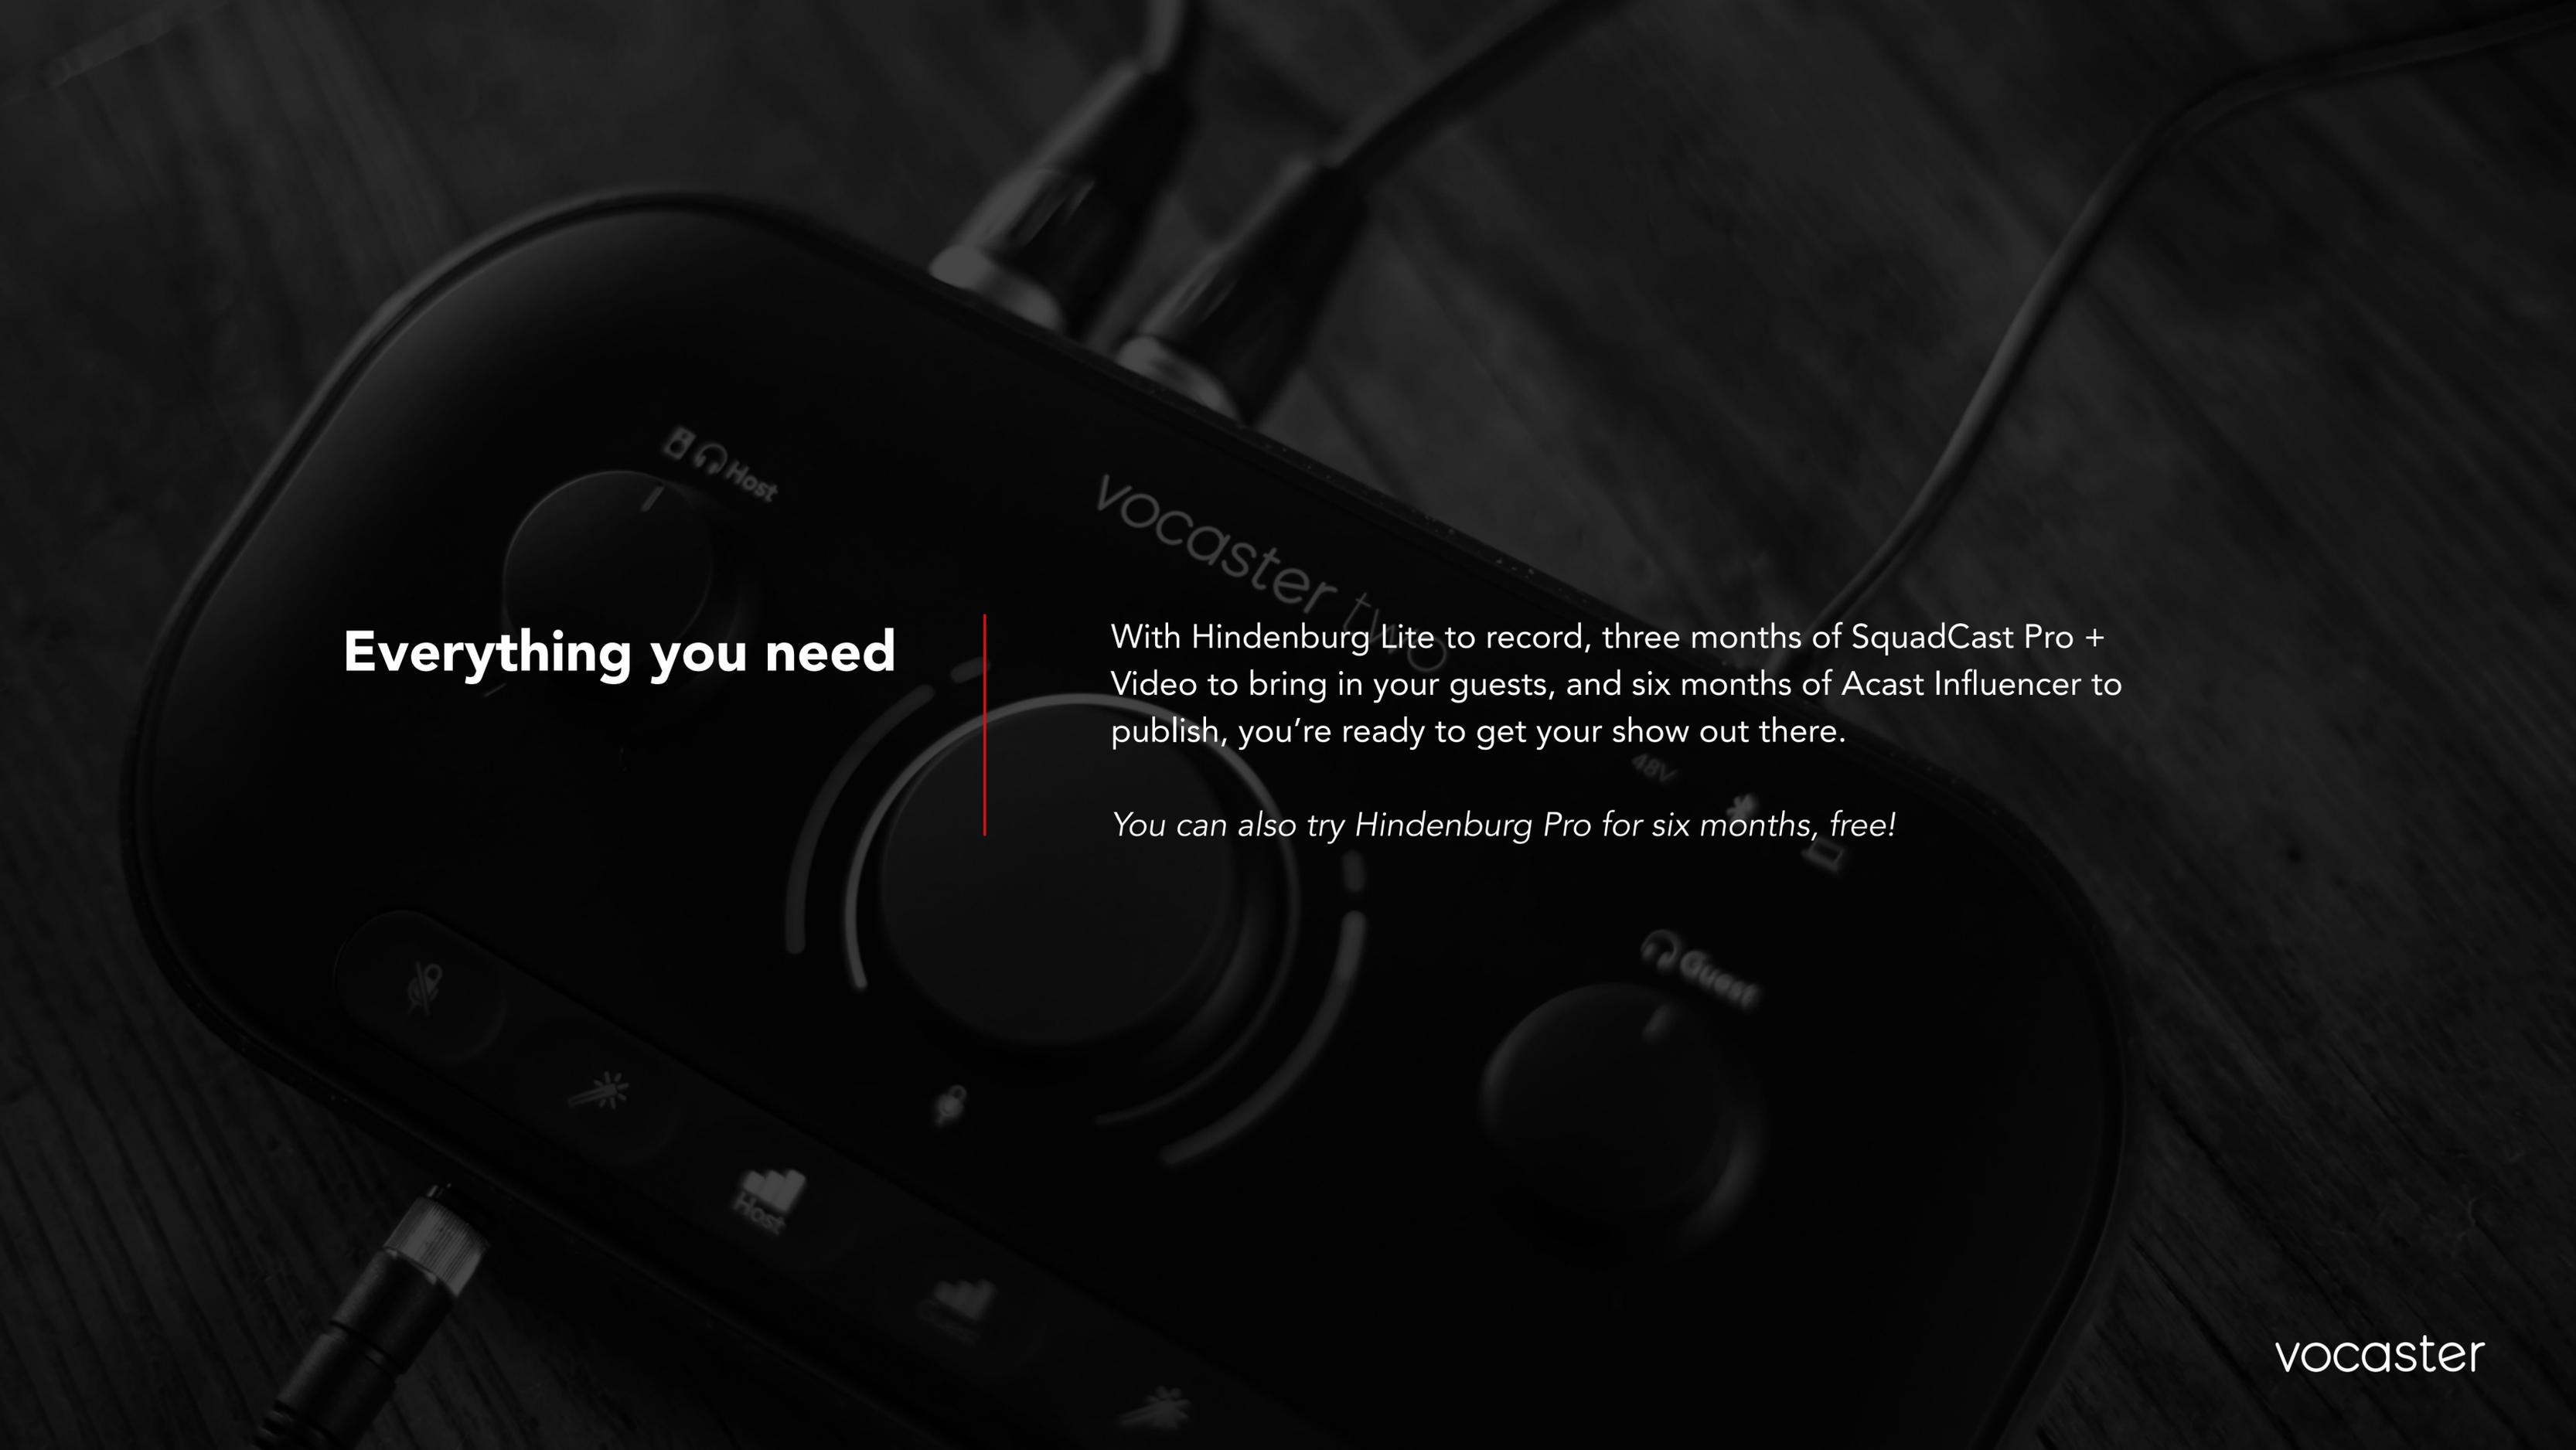

HP60v closed-back studio headphones let you hear your show as the world will, and stop the mic from picking up your show mix.

**It's never been
so simple**

Our Easy Start tool is the best in the business and gets you up and running smoothly. It's so easy to set up, you'll be on-air in no time. Three years of warranty and our award-winning 24/7/365 support keep you there.

Software Bundle

vocaster

With the Vocaster software bundle we wanted to provide a set of tools that give our customers the best opportunity to achieve their goals, from recording their show, and bringing in remote guests, to creating jingles, and publishing their show to the world.

So, we teamed up with some of the best Podcast brands globally to provide the most fully featured software bundle on the market, giving our customers the tools they need to Podcast.

Hindenburg

For Podcasting &
Radio Production

To Record

Hindenburg LITE (Perpetual license)
Hindenburg PRO (6-month trial)

Work smarter and faster with Hindenburg's easy-to-learn yet robust, field-tested audio editor designed to simplify and automate your spoken-word workflow.

Hindenburg has built every feature to solve common podcasting & radio challenges: from uneven levels, noisy recordings, and inconsistent voice sounds, to bleeding microphones and evolving loudness standards.

SquadCast

The Remote Recording Studio
That Your Audience Will Love

To Bring in Guests

SquadCast Pro + Video (3-month Trial)

Create high-quality audio and video content with SquadCast's in-browser software for premium recordings auto-saved with cloud storage.

A streamlined recording process for your guests allows them to focus on their objective: to tell their story.
